Software & Tools:	React, Node.js, MongoDB, HTML, CSS, Agile Methodologies, GitHub, PCF, Postman

Experience Highlights

Operations Reliability Engineer – Kroger Technology, Cincinnati, Ohio (Aug 2021 – Present)

- Worked on the Promotions team which monitored numerous Dynatrace and Echo dashboards that oversaw the company's: sales/discounts, code endpoints, server health, customer's loyalty points, and more.
- Gained leadership experience by being promoted to a Team Lead. Duties included: training new employees, completing advanced documentation, and attending critical meetings with numerous teams.
- Initiated and attended Major Incident (MI) calls to aid multiple teams in finding resolutions to errors.
- Resolved tickets of numerous priority levels in a timely manner so that the business' Service Level Agreements (SLA's) were not broken.

Software Engineer / IT Consultant – Tata Consultancy Services, Chicago, Illinois (Apr 2021 – Present)

- Excelled in the company's intensive three-month Initial Learning Program where modern programming concepts were learned such as new software, frameworks, tools, and technologies.

Software Developer Intern – Discover Financial Services, DeKalb, Illinois (Jan 2020 – Aug 2020)

- Built web-based full-stack applications using various programming languages and frameworks by pulling data from public APIs.
- Discussed requirements with users, wrote clean code, and tested the functionality of the application by participating in daily stand-ups with teams to fully optimize projects.
- Organized tech talks which aided in increasing employee skill development and job performance.
